The Company expects to release full, audited financial results and file its annual report on Form 10-K for the year ended December 31, 2025 on March 2, 2026.

Adjusted EBITDA**	\$217	\$227	5%	\$86	\$227	162%

*The Company previously provided updated 2025 financial guidance on November 4, 2025. This guidance stated that Operating Revenues, Net and Adjusted EBITDA for 2025 were expected to be in the range of \$544 - 547 million and \$215 - 218 million, respectively. The figures in the tables above represent the midpoints of those financial guidance ranges. Fourth quarter guidance implied based on year-to-date third quarter results.

**Non-GAAP measure. A reconciliation of this non-GAAP financial measure to the most directly comparable GAAP measure, net income, for the three and 12 months ended December 31, 2025, and 2024 will be included in the Company's earnings release for the fourth quarter and full year 2025 financial results, scheduled to be reported on March 2, 2026. See "Non-GAAP Financial Information" below.

The Company also expects its 4Q25 28 Days Past Due (28DPD) metric to be within the range of 1.95% to 2.00%, improving from the previously disclosed expectation of below 2.10%.

"We closed out 2025 with another record quarter, capping the strongest year in our company's history," said Jason Wilk, Founder and CEO of Dave. "Q4 represented our third consecutive quarter of 60%+ revenue growth, driven by accelerating monthly transacting member growth, continued ARPU expansion, and strong underlying demand for our products.

"The operating leverage embedded in our model continued to strengthen throughout 2025: full-year Adjusted EBITDA grew over 160%, nearly three times our revenue growth rate, a direct result of strengthening unit economics and deepening member relationships while maintaining our discipline on fixed costs. Credit performance continued to improve in the fourth quarter, powered by our proprietary CashAI underwriting engine.

"Furthermore, we are closely monitoring the recent proposal to limit credit card rates to 10%. We believe a meaningful rate cap on credit card interest rates would be a tailwind for our business: if issuer economics are materially compressed, industry leaders have suggested credit card access could decline by as much as 80%, with the sharpest pullback affecting non-prime and sub-prime consumers. Importantly, the need for liquidity does not disappear; it shifts to alternatives that better match a customer's needs and ability to repay such as ExtraCash, which does not charge compound interest or late fees."
